

# Parking Studies and Assessments

**Bitzios Consulting** has extensive experience in preparing parking studies, parking policy and parking layout assessments. Our staff have reviewed parking scheme rates, undertaken parking surveys, prepared parking supply and demand assessments and developed city-wide parking strategies as well as parking management strategies for CBD's, town centres and specific sites.

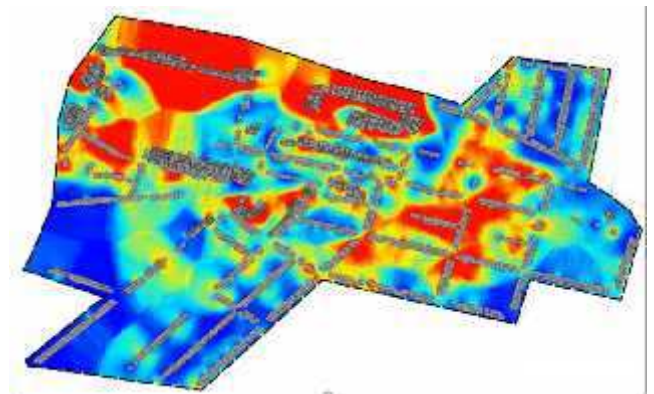

Our experienced transport planners understand the broader implications of parking policy and use our breadth of understanding in public transport and land use planning to provide informed advice on parking strategy.

In particular, we have developed innovative survey, mapping and analysis techniques which have supported the development of a number of parking strategy reports.

Parking policy and strategy is one of the most complex areas of transport planning as parking interfaces with land use/economic development, public transport and traffic issues. The breadth of our expertise in understanding the holistic impacts of parking is what sets us apart.
