

# Public Transport

**Bitzios Consulting** has extensive public transport policy, planning, modelling and evaluation experience having worked on a variety of projects across Queensland and in New South Wales.

We develop public transport policies, network plans and strategies and provide specific transport impact assessments of public transport corridors and bus stop consolidation. We have specialist experience in public transport project evaluation, including options

analyses and business cases for bus lane projects.

Importantly, our experience in integrated transport planning and in detailed traffic engineering and transport planning means that the planning and design of public transport is achieved with an appreciation of the strategic context and the specific needs of modal integration
