

Bitzios Consulting undertakes a variety of road safety studies for local and state government as well as for the private sector. We have a number of accredited road safety auditors on staff to undertake audits of varying complexity, anywhere in Australia and have completed in excess of 200 audits over the past few years.

In addition to road safety audits, we undertake speed reviews, Performance Based Standard (PBS) route assessments, signage and line-marking reviews, pedestrian audits and cycleway and cycle-facility design audits.

We also develop and review traffic management and traffic control plans.

Safety risks assessments are also undertaken for rail level crossings and for other unique situations where the traffic safety risk profile is changed.

Importantly, our road safety auditors are not just accredited auditors but are experienced traffic engineers and transport planners who are able to understand an issue from a broader transport planning perspective.

Selected projects include:

- Rio Tinto Mine Traffic Safety Assessments and Guidelines
- Griffith Arterial Rd RSA and Speed Review for TMR
